

KISHAN VISHWAKARMA

Full Stack Developer | React.js | Next.js | Node.js

+91 8530209965 | kishanvishwakarma6414@gmail.com | unsignedcoder.vercel.app

Professional Summary

Full Stack Developer with hands-on experience building and deploying web applications using React.js, Next.js, Node.js, Express.js, TypeScript, PostgreSQL, MongoDB, Redis, and Docker. Experienced in REST API development, API design, backend architecture, authentication and authorization, database optimization, responsive UI development, real-time systems, and production debugging. Comfortable working in fast-paced startup environments, independently owning features from development through deployment, and quickly learning and adopting new technologies, frameworks, and libraries. Strong attention to detail with a product-oriented mindset and focus on clean, reusable, maintainable code.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, React Query, Redux, State Management, Tailwind CSS, Responsive Web Development, REST API Integration

Backend: Node.js, Express.js, Fastify, REST APIs, API Design, Backend Architecture, JWT Authentication, Authorization, RBAC, Error Handling, Validation, Security, Worker Threads, WebSockets, JSON

Database: PostgreSQL, MongoDB, Redis, SQL, Database Design, Data Modeling, Relationships, Indexes, Query Optimization, Prisma ORM, Caching

Tools & Practices: Git, GitHub, Docker, Docker Compose, Prisma, Postman, API Documentation, Integration Testing, CI/CD, Debugging, Troubleshooting, Clean Code, System Design

AI & Modern Development: AI APIs, LLM Integrations, AI-Assisted Development, Ability to Learn and Adopt New Technologies and Libraries

Work Experience

MERN Stack Developer – Codestudios

Jul 2024 – Present

- Owned end-to-end delivery of full-stack features from requirement breakdown and technical planning to development, testing, and production deployment.
- Built scalable and responsive web applications using React.js, JavaScript, HTML5, CSS3, and Tailwind CSS with a focus on usability and maintainability.
- Designed and developed production-ready REST APIs using Node.js and Express.js, applying API design and backend architecture principles.
- Optimized MongoDB and PostgreSQL data models and SQL queries for efficient data access and reliable application performance.
- Implemented JWT-based authentication, authorization, RBAC, input validation, and security practices for controlled application access.
- Created and maintained API documentation and integrated REST APIs using JSON-based request and response formats.
- Debugged production issues, performed integration testing, and improved application performance and reliability through iterative optimization.
- Worked effectively in a fast-paced startup environment, independently handling features while learning and adopting new technologies and libraries as product requirements evolved.

Projects

Scalable Load-Balanced URL Shortener

Fastify, PostgreSQL, Redis, Docker

- Architected a scalable URL-shortening system using microservices and load-balancing principles for resilient request handling.
- Integrated Redis caching with PostgreSQL to reduce latency and improve performance under concurrent traffic.
- Containerized distributed services using Docker and Docker Compose for consistent development and deployment.

DataEngine – CSV & PDF Processing System

Node.js, Express.js, React, MongoDB, WebSockets

- Built a full-stack platform for reliable processing of large CSV and PDF workloads using Node.js and React.
- Implemented Node.js Worker Threads and a custom WorkerPool for concurrent processing and improved throughput.
- Developed WebSocket-based real-time telemetry to track processing progress, worker activity, and failure states.

Education

B.Sc. Computer Science – Viva College, Mumbai University

Jun 2022 – Apr 2025

CGPA: 7.5

Diploma in Web Development – Comtech IT World

Jun 2022 – Jul 2023

Additional Information

Languages: English, Hindi, Marathi

Strengths: Problem Solving, Analytical Thinking, Debugging, Clean Code, Documentation, Independent Feature Ownership
